

MEDTASK

Online Practice Management

The First 100% Online Practice Management System

SCHEDULING | BILLING | ERA | REPORTING | EHR | SECURE | 24/7 ACCESS

At MedTask, We Believe In:

"When my laptop was stolen from my ambulance, I was grateful that my patient information was housed off-site with MedTask."

Transparency: As a MedTask customer, you know what your fees are. All inclusive, a flat rate subscription fee assures that you'll have no hidden cost or extra fees for our services. When we say "all-inclusive" we mean it.

Efficiency: 98% of MedTask electronic claims are paid on first submission because pre-check function flags detect any errors or missing information before the claim is filed. This gives our customers confidence in their billing.

Collaboration: Our customer support team is ready to answer questions, help you learn and make your online billing and patient management experience seamless, secure and easy. We give you control over your billing. MedTask processes all of your claim reports. You will never create a report to send claims or download reports to find errors. These critical elements of our service mean you have more time for your practice.

Updating: We constantly update and backup your software and codes, so you never have to worry. And any changes to codes or standards are seamless so you won't miss a beat!

Flexibility: Because we are 100% web-based, we empower our clients with control to manage their practice and billing whenever and wherever it's most convenient. If you have access to the Internet, you have access to MedTask.

Security: Since no data sits on your computers or servers, your business and patient information is always secure and safe. You will see no loss of business if computers are stolen, your office damaged or any files become corrupted.

Our existing customers are our best form of marketing. MedTask offers an attractive referral program to reward customers who tell their colleagues about MedTask. To learn more about our referral program, contact MedTask at 888-663-3827.

Welcome to the first 100% web-based online practice management system. With more than 10 years' experience serving clients, MedTask is a trusted, proven solution for your online practice management. Our solid knowledge of billing processes, insurance procedures, Medicare processing, online security and claims issues can help you create office efficiency and cash flow for total peace of mind.

The MedTask Story

When MedTask was founded in 1997, the vision was, and remains today, to offer an easy, secure and affordable system for independent practitioners and online practice management. By making patient information, insurance billing and cash flow management efficient and affordable, MedTask makes it possible for medical practitioners to focus on the business of medicine, not claims management. Today, as the first-ever medical billing system designed completely for the web, MedTask is still leading the industry.

MedTask leaders saw an opportunity to provide cross-platform, cross-connection access to 24/7 patient and billing data, which is constantly backed up and updated. Clients require timely information and access to changes in HIPAA compliance, codes, standards and procedures to effectively and efficiently process billing. MedTask recruited the best developers across industries to bring technologies and best practices in developing a proven web-based solution for the medical industry.

Today, MedTask enjoys a loyal customer base of medical offices, healthcare providers, billing services and service based claims offices across the US. Supported by a dedicated customer service team at MedTask headquarters in Colorado, customers benefit from control with a complete, comprehensive and efficient web-based solution to their online practice management and patient management needs.

"When a Hurricane struck our area, we would have lost everything if our patient data and billing information had been in our office. Because we used MedTask's online practice management, none of our billing was interrupted – not even for a day!"
